## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gilmer et al. 2002/01933494, in view of Nakahashi et al. 4,788,244, Sakai et al. 5,115,010, Martens et al. 5,618,865, Kasowski et al. 6,025,419, Cosstick et al. 6,166,114, Oka et al. 6,258,927 or Martens et al. 6,350,802.
3. The rejection is maintained in view of the "Response to Arguments" below.

### ***Response to Arguments***

4. Applicant's arguments filed 10/10/08 have been fully considered but they are not persuasive. Applicant's amended range of 1-20 wt.% of polyamide oligomer is too close to the concentration shown by Gilmer et al. (22 wt.%) to make it non obvious. Although the concentration range claimed by applicant does not encompass or overlap the concentration shown by Gilmer et al. in Example 17, a prima facie case of obviousness exists where the claimed range and the values disclosed by the prior art are close enough that one skilled in the art would have expected them to have the same properties. See Titanium Metals Corp. of America v. Banner, 227 USPQ 773 (Fed. Cir. 1985). In the instant case applicant submitted no proof that there is a significant change in properties when the polyamide concentration is increased from 20 wt. % to 22 wt. %.
